EMPLOYMENT

Frontend developer
C-Sunshine   **September 2021 - November 2022**

• Implemented websites and landing pages from concept through deployment, resulting in a 15% increase in conversion rates for n ew customers and returning customers.
• Improved user experience by making the output of the website responsive, mobile-first, accessible, and optimized for SEO.
• Contributed to backend services to resolve issues by fixing bugs in the backend codebase and adding features to existing API endpoints.
• Implemented a visualization application using vis.js and d3.js to display the current geolocation of customers on a map.
• Created React reusable components, unit tested with React-testing-library, and quickly developed prototypes using information provided by the product team.

Web developer
Interactive Cares   **August 2021 - December 2021, Dhaka**

• Deployed a new content management system to 300+ users, reducing the time it takes to update website content from 1 week to 1 hour.
• Developed a backup and restore technology for a website's files and DB, saving 5 hours per week for the team.
• Responsible for creating a monthly dashboard showing metrics like unique visits, visits, page views, and bounce rate.

Web developer intern
Interactive Cares   **May 2021 - August 2021, Dhaka**

• Developed user interfaces with modern JavaScript frameworks, HTML5 and CSS3.
• Researched and developed new technology designs.
• Developed and improved web application performance and scalability by 60%, reducing loading time to less than half a second.
• Reduced web application bugs by 43% through effective debugging, troubleshooting, and bug fixes.

PROJECTS

Shoplo App
• Created a front-end e-commerce website having different types of products for sale using React and Redux with the Stripe payment system.
• Technology: React, Redux, Stripe, Firebase.

Course Management
• Full-stack project to manage students, teachers, class schedules, and class resources.
• Technology: React, Java Spring boot, MySQL.

Invoice
• Created an invoicing application using React and Redux with the Stripe payment system. Stored invoices and has functionality to pay via Stripe.
• Technology: React, Redux, Stripe.

EDUCATION
